

Joe Conway is the Chief Technology Officer of Fed Centric Technologies and Founder of Blockstr Technology Group. Joe has spent the last 30+ years designing high performance, mission-critical information systems for government customers in the Civilian, Defense and Intelligence Communities. Joe is a strategic thinker who approaches business challenges and technology capabilities with both curiosity and creativity, asking “Why not?” In his journey through the ranks at a Government research lab to a large enterprise software vendor to a small boutique reseller and systems integrator, Joe combines a rigorous and creative hands-on approach to providing emerging technology proof points and prototypes wrapped with customer-focused collaboration and service. A life-long learner, Joe recently immersed himself in the emerging realm of distributed ledgers, blockchain and digital currencies, believing that these new technologies will fundamentally disrupt and transform business and government in ways we have yet to fully comprehend.

Mr. Conway holds a Masters of Science Degree in Information Systems Technology from George Washington University, and is a recognized thought leader and practitioner in the area of real-time enterprise-class big data analytics.
